CBV42 Series Zero Client Box

▶ CBV42-B

Zero Client Box

▶ CBV42-BP

Zero Client Box with DisplayPort™

Features

HIGH PERFORMANCE VIRTUAL COMPUTING
The CBV42 Series utilizes a Teradici® PCoIP® processor, VMware or Amazon WorkSpaces to deliver a powerful and secure virtual solution that broadens integrated computing beyond design labs, to offices and classrooms.

SIX USB 2.0 CONNECTIONS
With zero client devices, connectivity is critical. The CBV42 Series provides multiples ways to connect, including six connections for USB 2.0.

LG ZERO CLIENT FLEXIBILITY
Compared to a traditional desktop computing system, the CBV-42 Series allows advanced computing with greater security. This Zero Client Box combined with a Teradici PCoIP Processor and Amazon WorkSpaces or VMware provides ultimate cloud desktop experience.

LG ZERO CLIENT SECURITY
PCoIP zero clients significantly reduce the risk of virus, spyware, or hacking because all data, storage, and memory are stored at a secure central data center. Data never leaves the data center, it only transmits as graphical pixels, making our zero clients suitable for security-critical organizations such as financial firms..

CBV42 Series Highlights

Ultra Secure

Zero Client Flexibility

High Performance Virtual Computing

Teradici PCoIP Processor

512 MB Memory

6 x USB 2.0 (4 Rear, 2 Side)

10/100/1000 Ethernet
